PROFFESSIONAL EXPERIENCES

LEAD SR. SOFTWARE ENGINEER
Softcand | 2020 - Current

Softcand is an Istanbul based startup company and mostly developing a live support app, but also offered some quality software services such as custom software, mobile application and web design development.

- Created a fullstack application from design to testing that has a secure, peer-to-peer, instant messenger with many featured admin panel.
- Implemented chatbot feature that lets software think and behave like a live human being. It also performs a lot of functions, from publishing posts to managing finances, depending on the users' needs.
- Managed ongoing projects by training and supervising team members.
- Deliver highly efficient application-based solutions to optimize the company's need like CRM and integration plugins.
- **Tech Stacks**: NodeJs, GoLang, Express, Typescript, VueJs, React-Native, Docker, Kubernetes, Jenkins, Git, Redis, MongoDB, PostgreSQL, gRPC

SR. SOFTWARE ENGINEER
Ideall Technology | 2019 - 2020

Ideall Technology is a technology company specialized in development, visual communication and knowledge transfer. They help businesses elevate their value through custom software development, product design, QA and consultancy services.

- Take an active role in many projects as a software engineer.
- Share my experience to support clients in technology road mapping and exploring most efficient ways to use available resources and technology trends.
- Completed all phases of planning, developing, and debugging web applications and such software services like advanced educational platform and an integrated travel and reservation application.
- Participated in interviewing and recruiting candidates.
- **Tech Stacks**: NodeJs, ReactJs, React-Native, Git, SQS, Lambda (SLS), Cognito, DynamoDB, Knessis

ADITIONAL EXPERIENCES

I have worked on many projects as a freelancer. At first, I wrote php based content-management blog websites. I developed iOS apps with Swift at the university and afterwards. I developed e-commercive apps in particuler. After learning ReactJS and React-Native, I started to develop iOS-Android apps by switching to cross platforms. It didn't take me long to discover and start using AWS services. Then, I coded some real estate apps like AirBNB by using many AWS services.

EDUCATION

UludagUniversity 2013 - 2018

Bachelor in Department of Computer Education and Educational Technology

SKILLS

- Knowledge and hand-on experience with operating systems (maintenance, troubleshooting)

PROJECTS

SR. SOFTWARE ENGINEER
Easybox | 2021 - Current

I have launched a CRM designed to align team members with smoother execution for my company. With this app, the company find the opportunity to analyze and visualize its capabilities while keeping everyone engaged.

SR. SOFTWARE ENGINEER
Servisizle | 2021 - Current

I have been created a software intuitive solution with benefits for parents, school transport providers and administrators. I have used micro services for my backend services. The project's goal is to help parent keep track of their kids who ride the bus home and service drivers improve their fleet's payroll system.
